

Safety & Infrastructure

21 February 2018

Present was Administrator Jeff White; Mayor Mike Henwood; Chairman Sherman Prince; Sue Henwood; Debbie Wolfe.

Well #6 looks like it will be finished on time.

Surge protector for Sewer Plant will be approximately \$3,000.

Fire hydrant@ Oak and Marietta Streets needs sign, out of order.

Hydrant at Superior Plant is a nonworking one, dummy.

Trees at 141 Bartlett and 529 Fort Streets need attention. We also need to identify other trees that need attention as we do not seem to have a tree board.

Be sure to sign keys in and out, not pass them around.

Come spring there is a portion of sidewalk and curb that Byron dug up to put a water meter in at the old library across the street from Me that needs to be fixed.

We have several meters that don't work. The meters run about \$120 a piece so we can't order them all at once, but as we replace them.
